Synonyms (comma separated)

SL 330, SL330, SL-330

The screenshot displays the Zehnder Production CMS interface. On the left is a sidebar with a 'Dashboard' menu and a tree view of the site structure under 'Zehnder Production'. The main content area is titled 'Downloads & Broschüren (1369)' and shows a list of content items. The first item is 'Heizkörper - Downloads' with a description: 'Broschüren, Produktdatenblätter, technische Unterlagen, Anleitungen, Planungsdaten, Preislisten und vieles mehr.' Below this is a 'DAM Download overview' section. At the bottom, there are two columns labeled 'Left' and 'Right', each containing a 'Pages (Teaser)' item. The interface includes a top navigation bar with various tabs and a search bar, and a bottom status bar showing a timer at 0:00 / 1:34.

Important note:

When you maintain a page, the page will be not findable in the search until the index has been renewed. Our Index updater runs every 5 minutes and updates 50 content items per run. So in best case your revision would be available after 5 minutes. If any other revisions are triggered in the same timeframe (>50 items) it can last a little bit longer until your revision is available.
